Please be advised, the New Jersey Department of Agriculture has determined that property within the RiverWinds area will be treated for the Spotted Lanternfly. Please see below for pictures of the Spotted Lanternfly.

The Spotted Lanternfly is an invasive species that is native to China. The insect can impact agriculture, as they feed on many types of trees. Spotted Lanternflies are often found on the Tree of Heaven, and prefer to nest on the Tree of Heaven as they grow.

If you see a Spotted Lanternfly, please take a picture with your GPS function turned on and submit to SLF-plantindustry@ag.nj.gov. If there are egg masses, you may scrape them off, double bag and throw the bug away. Their eggs can be killed by placing them in alcohol, bleach, or hand sanitizer.
